

FROM THE DIRECTOR
U.S. CENSUS BUREAU

The Census Bureau is conducting the 2000 Boundary and Annexation Survey (BAS) to update information about the legal boundaries, names, governmental status, and types of federally recognized American Indian reservations and off-reservation trust lands in the United States. This voluntary survey is your opportunity to ensure that we have the correct boundary and name for your government when we present statistical data from Census 2000.

It is important that you report only changes that take effect on or before January 1, 2000. Census 2000 will use the boundaries that are legally in effect on January 1, 2000.

To ensure that the Census Bureau has processed your response(s) correctly, we will send a new map to you after we process your response. We will mail this map to the highest tribal official of your government as part of our Boundary Validation Program. This will give your government a final opportunity to review the BAS information before we tabulate data from Census 2000.

Please use the enclosed "2000 BAS-Guide" insert for instructions on how to show changes or call the Los Angeles Regional Census Center Geography staff at 818-904-6415 for further assistance. If no corrections are required, please return the BAS survey form(s) and at least one signed map. We are enclosing a postage-paid return envelope and label for your convenience.

We respectfully request that you return all materials to the Los Angeles Regional Census Center within 60 days after you receive these materials to ensure your changes are reflected in Census 2000. We estimate that most respondents will take from 1 to 4 hours to complete the survey with an average time being about 3 hours. This includes the time you will need to read the instructions, assemble materials, organize and review the information, update the map(s), and report the information on the BAS forms. We base our estimate on 80 percent of all areas having no changes. We also know that it is not uncommon for areas with many changes to take 20 hours or longer to complete the survey. If you have comments regarding these estimates or any other aspect of the survey, send them to: Associate Director for Finance and Administration, Paperwork Reduction Project 0607-0151, Room 3104, Federal Building 3, Bureau of the Census, Washington, DC 20233-1500. This voluntary survey is authorized by Title 13, United States Code.

If you need help with this request, please write or telephone the Los Angeles Regional Census Center geography staff at 818-904-6415. The Census Bureau is grateful to you for your help.

Sincerely,

Kenneth Prewitt
